SUMMARY

Seasoned full-stack developer with 5 years of experience building end-to-end web and mobile applications across multiple industries. Proficient in backend development using Laravel, Golang, Python, C, Java, Node.js, and Express, and frontend technologies including Next.js, AngularJS, and ReactJS. Experienced in mobile development with React Native, delivering scalable, maintainable, and high-performance solutions. Known for strong ownership, clean architecture practices, and the ability to translate business requirements into reliable technical implementations. A collaborative team player who adapts quickly to new technologies and consistently delivers high-quality results in fast-paced environments.

EXPERIENCE

Senior Software Engineer • PT. Astra International Tbk

June 2026 – Present

- Developed and maintained **MotorkuX**, Astra Motor's mobile application, using **React Native**, focusing on feature implementation, performance optimization, and REST API integration.
- Developed and enhanced the **Digiroom** mobile application for **Auto2000**, implementing new features, improving user experience, and integrating with enterprise backend services.
- Contributed to the development of **frontend web applications** using **React.js / Next.js** to support internal business processes and customer-facing digital services.
- Collaborated with backend engineers, UI/UX designers, QA engineers, and product stakeholders to deliver scalable and maintainable enterprise applications.
- Integrated mobile and web applications with enterprise APIs while ensuring secure authentication, data consistency, and optimal application performance.
- Participated in code reviews, sprint planning, technical discussions, and release activities following Agile/Scrum development practices.

Software Engineer • PT. Astra Land Indonesia (Astra Property)

March 2025 – May 2026

- Architected and maintained the **central RESTful API** using Laravel, serving as the core backend for all web, mobile, and internal applications across the organization.
- Developed and maintained **cross-platform mobile applications** with React Native, improving performance, stability, and user experience across multiple projects.
- Managed and enhanced the **centralized authentication system** built with Java Spring Boot to ensure secure, unified access across all platforms.
- Built and maintained internal and customer-facing web applications using AngularJS, ReactJS, and Next.js, supporting operations, agent workflows, referrals, and visitor management.
- Handled end-to-end development and maintenance for multiple systems, ensuring scalability, reliability, and consistent integration across the company's digital ecosystem.
- Collaborated with product, design, and business teams to translate requirements into scalable technical solutions.
- Performed code reviews and system optimizations to improve application performance, maintainability, and reliability.

Software Engineer • PT. Global Service Indonesia

November 2022 – March 2025

- Led the development of multiple web, backend, and IoT solutions across internal and client-facing products.
- Designed and built a full-featured **accounting system** using Go and Laravel, improving financial processing and reporting efficiency.
- Developed and maintained an **attendance management application** using PHP, ensuring accurate tracking and reliable daily operations.
- Built a **real-time dashboard platform** using ReactJS and NestJS to deliver data insights and operational monitoring tools.
- Implemented and customized an **Odoo 15 Helpdesk system** to streamline customer support workflows and ticket management.
- Developed **Gotjob.id**, a job portal built with Python and VueJS, connecting employers with qualified candidates.
- Engineered an **IoT-based Smart Forklift system**, integrating hardware and software to improve safety and operational efficiency.
- Collaborated with cross-functional teams to conduct market and product analyses, define technical solutions, and produce system design and specification documents.

Physics Techno Research • Badan Tenaga Nuklir Nasional (BATAN)

July 2021 - September 2022

- Designed and developed a **microcontroller-based radiation monitoring system** for real-time nuclear radiation detection.
- Integrated and calibrated radiation sensors to ensure accurate and reliable data acquisition.
- Developed firmware to process and transmit radiation data securely in real time.
- Built an **Android application** to display radiation readings, alerts, and monitoring thresholds.
- Implemented communication protocols between the hardware device and mobile application for seamless data transfer.
- Collaborated within a small engineering team to deliver the end-to-end hardware and software solution.

Home Service • PT Telkom Indonesia (Internship)

July 2020 - September 2020

- Assisted in monitoring service orders and daily operational activities.
- Handled customer data processing and reporting for service operations.
- Contributed to service improvements that increased customer satisfaction by up to 50%.

EDUCATION

September 2018 – September 2022

Telkom University

Bachelor's degree in Telecommunication Engineering, Faculty of Electrical Engineering

SKILLS

Technical Skills

- Languages: JavaScript, PHP, Golang, Python, Java, C
- Backend: Laravel, Node.js, Express, Spring Boot, Django
- Frontend: ReactJS, Next.js, AngularJS
- Mobile: React Native
- Databases: MySQL, PostgreSQL, MongoDB
- API & Integration: RESTful APIs, GraphQL, gRPC
- Version Control: Git (GitHub, GitLab, Bitbucket)
- Testing: Go testing, PyTest, Selenium, JMeter

Tools & Practices

- Architecture: Monolithic, Microservices
- DevOps & Cloud: Docker, GitLab CI/CD, Jenkins, AWS, GCP
- Methodologies: Agile (Scrum, Kanban), Waterfall
- Collaboration: Code Reviews, Technical Documentation, Cross-team Coordination
- Problem Solving: System Design, Performance Optimization, Refactoring

ACHIEVEMENT & CERTIFICATION

- **Most Contribution Innovation Paper**
2023 – PT Global Service Indonesia
 - **The Best Innovation Warrior**
2023 – PT Global Service Indonesia
 - **Grand Finalist Inovy Competition**
2024 – Yayasan Karya Bakti United Tractors
 - **PCAP: Programming Essentials in Python**
2020 – CISCO Networking Academy
 - **AWS Certified Developer – Associate**
2022 – Amazon Web Services
 - **HackerRank Certifications (Verified)**
 - **Software Engineer**
<https://www.hackerrank.com/certificates/eac60ac2f83a>
 - **React (Frontend Developer)**
<https://www.hackerrank.com/certificates/e740b8e62f40>
 - **Angular (Intermediate)**
<https://www.hackerrank.com/certificates/4047a9d48021>
 - **Node.js (Intermediate)**
<https://www.hackerrank.com/certificates/c2085a9b6c39>
 - **REST API (Intermediate)**
<https://www.hackerrank.com/certificates/3fafcaaa1c95>
 - **SQL (Advanced)**
<https://www.hackerrank.com/certificates/b9af0db8af4a>
 - **Go (Intermediate)**
